AEC Europe – Press Release

## **AEC unveils the Prins LPG System for the RAM 1500**

AEC – an authorized distributor for RAM in Europe – and Prins Autogassystemen BV, a Dutch world leader in alternative fuel solutions, combined their broad experience and technical knowledge by launching a new exclusive edition of the VSI-2.0 LPG System designed specifically for RAM 1500 with the popular 5,7L V-8 Hemi® engine.

Its optimum performance in terms of power, quality and flexibility, as well as very attractive fuel costs make this pickup truck appealing to a wide range of customers. Both AEC and Prins ensure high quality installations and rigorous end of line tests on all vehicles through central conversions, accomplished in AEC's Vehicle Processing Center in Antwerp, Belgium. Thanks to Prins validated software and accurate calibration tested on a dyno bench, the RAM 1500 with LPG System performs optimal under all circumstances.

The benefits of LPG as an alternative fuel are both economical and practical: not only LPG fuel is approximately 50% less expensive per liter than gasoline, but it also offers the driver an extraordinary long combined driving range. RAM 1500 with the 5,7L V-8 Hemi® engine paired with VSI-2.0 LPG System can go up to 900 km (LPG and gasoline combined) thanks to the additional space-saving round underbody tank with gross capacity of 122L (ca. 98L fuel capacity).

As part of the RAM 1500 with LPG System with two extensive warranty solutions for the vehicle itself – up to 100.000 km/24 months and up to 150.000km/48 months – as well as 3 years parts warranty on the LPG System.

### **About AEC**

AEC is an authorized importer for the brands DODGE and RAM in Europe, in cooperation with Fiat-Chrysler Automobiles US LLC. AEC supplies vehicles to the consumer through its extensive European retail network that currently includes over 150 dealerships across the continent with over 300 points of sale. With services including but not limited to controlled homologation for all markets, extensive warranty and after-sales support, AEC's network is a safe address for European consumers looking to purchase a DODGE or RAM vehicle.
